## About the Eagle Brace Charity

The Eagle Brace is was designed by monies donated to scoliosis research at the Children's Hospital and University Hospital of Calgary. The brace was designed to be created using cameras and 3D imaging to provide maximum benefit without the use of x-ray machines that expose scoliosis patients to high amounts of radiation regularly The Eagle Brace communicates results in the form of data to a computer to help measure the progress of the patient. Your donations are welcome and appreciated.

## From the Kitchen

We are still in need of volunteers to help in the kitchen on a Sunday morning. Put a crew together or come and join Eddie & I, will train you.

As a reminder, if you see something on the menu you want, please order early. You can call as well. For example, Chef Salad or Liver N onions. I need to now the week before not the day of. I appreciate your help with this, as I hate turning people away and your satisfaction is our goal. Thanks again.

Bev
